

KIP Fold 2000 Series Systems

- Precise document folding
- Operates at full print engine speed
- Ultra-quiet operation
- Online and offline folding capability
- Fully integrated with KIP software
- Color Touchscreen Controls
- Compact Footprint

KIP FOLD 2000

KIP folding and finishing systems automate wide-format document folding requirements by providing folding, stacking and collation in a compact design. KIP online folders intelligently communicate with KIP printers and are fully integrated with KIP software applications & printer drivers to provide seamless workflow integration.

High Speed, Versatile Folding

KIP systems print production is folded and stacked at maximum speed, allowing for easy document filing and distribution. A reliable and durable fold roller system ensures maximum packet accuracy. Flat output stacking is included as a standard feature. Users may conveniently select fold style preferences at their workstation before printing. The KIP 2000 folding system features the flexibility to fold documents with precision, regardless of print orientation. Prints are accepted in either landscape or portrait format, allowing for fast and efficient folding operation.

Powerful Software Integration

KIP print submission software and application drivers provide a variety of advanced folding options. Network and browser based applications give users control over all fold patterns, as well as the ability to create, control and retain folding presets.

KIP Folding System Features

Feature	Standard	Optional
Offline manual folding	✓	
Fan fold 180mm to 300mm adjustable panels up to 6m length	✓	
Integrated flat stacking on bridge with 100 print capacity	✓
